

MICHELLE DUELL

michelle.m.duell@gmail.com | (409) 543-3900 | Active TS/SCI Clearance
[linkedin.com/in/michelle-duell](https://www.linkedin.com/in/michelle-duell) | github.com/aeronique | aerobytes.io

Professional Summary

Security researcher and intelligence professional with an active TS/SCI clearance, currently conducting adversarial testing of AI systems as an AI safety red team fellow. Eight years of operational targeting and multi-source intelligence experience, a published 16-report threat intelligence series, and podium finishes in national cybersecurity competitions. Seeking threat hunting, threat intelligence, incident response, SOC, detection engineering, and AI red teaming roles.

Certifications

CSA Trusted AI Safety Expert (TAISE) | 2026
GIAC Certified Incident Handler (GCIH) | 2026
GIAC Security Essentials (GSEC) | 2025
GIAC Foundational Cybersecurity Technologies (GFACT) | 2025
GIAC Advisory Board (90%+ exam score) | 2025

Professional Experience

AI Safety Red Team Fellow | Handshake AI | Remote (Contract) | Jul 2026 to Present

- Conduct structured adversarial testing of large language models, probing model behavior against safety policies and documenting reproducible findings
- Apply offensive security methodology and threat intelligence tradecraft to identify failure modes in frontier AI systems

AI Workflow Engineer & Threat Content Analyst (Volunteer) | KC7 Foundation | Remote | 2026 to Present

- Designed and built an agentic LLM pipeline of 45+ specialized agents, cutting threat scenario production time from roughly three weeks to roughly three hours
- Contributed to 6+ published games on KC7's free cybersecurity education platform, authoring threat scenarios and investigative workflows
- Review threat scenarios and investigative workflows for technical accuracy, validating that attacker techniques reflect realistic TTPs

Intelligence Analyst | U.S. Army Reserve | Norfolk, VA | 2018 to Present | TS/SCI Clearance

- Conduct strategic and operational-level targeting as Joint Intelligence Targeting Staff (J2T) member supporting combatant command operations
- Lead Joint Targeting Team of 9 personnel, coordinating cross-functional intelligence production and delivering targeting packages to operational commanders
- Conduct multi-source data correlation to identify adversary TTPs, synthesizing classified and open-source intelligence into actionable threat assessments

Cybersecurity Projects & Skills

- **Cloud Threat Intelligence** | Deployed T-Pot Community Edition on GCP for 28 days, collecting 96M+ events across a fully exposed attack surface. Queried raw Elasticsearch data daily to track CVE exploitation trends, active campaigns, credential attack patterns, and cloud infrastructure abuse. Published a 16-report CTI series at aerobytes.io.
- **LLM Red Team MCP Server** | Built an original Python MCP server (github.com/aeronique/llm-redteam-mcp) that runs adversarial prompt probes against local Ollama models, with 47 passing tests
- **Ghidra Function ID Pipeline** | Built a repeatable pipeline generating Ghidra Function ID databases for glibc across four Ubuntu releases (29,578 functions), raising named functions in a stripped test binary from 7 to 144

- **AeroLab v2** | Designed and deployed a segmented purple team environment across two Proxmox nodes, running pfSense, Windows Server 2022 with intentionally misconfigured Active Directory, Elastic SIEM 9.x, and Velociraptor for live endpoint forensics
- Executed ATT&CK-mapped adversary emulations with MITRE Caldera targeting identity-based attacks including Kerberoasting, AS-REP roasting, Pass-the-Hash, and DCSync, capturing and analyzing attack telemetry in Elastic SIEM

Speaking Engagements

“Reverse Engineering with Ghidra for DNS Exfiltration”

- WiCyS 2026 National Conference | Washington, DC | 2026
- WiCyS San Diego Cyber Speaker Series | Virtual | 2026

Technical Writing & Publications

Author technical reports and analysis documenting CTF challenge solutions, honeypot deployment findings, blockchain security research, and homelab infrastructure. Published 30+ articles at aerobytes.io/writeups, including a 16-report threat intelligence series.

CTF & Cybersecurity Competition Results

- **1st Place Overall & 1st Place Industry Professional** | 2026 WiCyS Conference CTF
- **1st Place** | 2026 Tenable x WiCyS CTF
- **2nd Place** | 2026 Elastic Security CTF
- **2nd Place** | 2025 WiCyS x Target Cyber Defense Challenge
- **5th Place & Runner-Up Most Creative Report** | 2025 SANS Holiday Hack Challenge

Education

SANS Cyber Academy | SANS Technology Institute | 2026

Undergraduate Certificate, Computers and Networking | American Military University | 2022

Associate of Applied Science, Intelligence Operations | Cochise College | 2019

Master of Music Education and Bachelor of Music Performance | Lamar University

Professional Affiliations

VetSec | WiCyS Representative | 2025 - Present

Women in CyberSecurity (WiCyS) | 2025 - Present

Military Cyber Professionals Association | 2025 - Present

Military Intelligence Corps Association | 2018 - Present

Other Work Experience

OSINT Researcher (Volunteer) | National Geospatial-Intelligence Agency | GEMINI Program | 2020 to Present

- Utilized Overpass API and OpenStreetMap to query and validate geospatial datasets, contributing 5,000+ map edits supporting critical infrastructure mapping and intelligence community requirements
- Designed and administered 15 critical infrastructure mapping campaigns to sustain team readiness and support operational intelligence

Music Educator and Professional Musician | Various Organizations | 2004 to 2015

- Led highly successful band program of approximately 500 students, earning multiple regional and state recognitions for performance excellence
- Performed as Assistant Principal Clarinet in three professional symphony orchestras and as multi-woodwind specialist in musical theater pit orchestras
