

MICHELLE DUELL

michelle.m.duell@gmail.com | (409) 543-3900 | Active TS/SCI Clearance

[linkedin.com/in/michelle-duell](https://www.linkedin.com/in/michelle-duell) | github.com/aeronique | aerobytes.io

Professional Summary

Intelligence professional and SANS Cyber Academy Scholar with active TS/SCI clearance, bringing years of operational targeting, adversary TTP analysis, and multi-source intelligence experience to cybersecurity. Seeking analyst positions in threat intelligence, incident response, or SOC environments.

Certifications

CSA Trusted AI Safety Expert (TAISE) | 2026

GIAC Certified Incident Handler (GCIH) | 2026

GIAC Security Essentials (GSEC) | 2025

GIAC Foundational Cybersecurity Technologies (GFACT) | 2025

GIAC Advisory Board | 2025

Speaking Engagements

“Reverse Engineering with Ghidra for DNS Exfiltration”

- WiCyS 2026 National Conference | Washington, DC | 2026
- WiCyS San Diego Cyber Speaker Series | Virtual | 2026

Technical Writing & Publications

Author technical reports and analysis documenting CTF challenge solutions, honeypot deployment findings, blockchain security research, and homelab infrastructure. Published 8 articles at medium.com/@aeronique

Professional Experience

Geospatial Intelligence Analyst | U.S. Army Reserve | Norfolk, VA | 2018 to Present | TS/SCI Clearance

- Conduct strategic and operational-level targeting as Joint Intelligence Targeting Staff (J2T) member supporting combatant command operations
- Lead Joint Targeting Team of 9 personnel, coordinating cross-functional intelligence production and delivering targeting packages to operational commanders
- Produce 10+ imagery-based targeting products monthly, enabling commander decision-making for time-sensitive operational requirements
- Conduct multi-source data correlation to identify adversary TTPs, synthesizing classified and open-source intelligence into actionable threat assessments

AI Workflow Engineer & Threat Content Analyst (Volunteer) | KC7 Foundation | Remote | 2026 to Present

- Contributed to a published investigation, authoring a threat scenario and investigative workflow released on KC7's free cybersecurity education platform
- Designed an agentic content pipeline using LLM-powered agents that takes a human-authored scenario concept and generates the full game, including threat narrative, datasets, and KQL queries, with projected production time dropping from 2-3 months to approximately 2 weeks
- Review threat scenarios, datasets, and investigative workflows for technical accuracy, validating TTP realism, identifying gaps before scenarios reach learners, and providing structured feedback to the KC7 team to maintain consistent quality standards

CTF & Cybersecurity Competition Results

- **1st Place Overall & 1st Place Industry Professional** | 2026 WiCyS Conference CTF
- **1st Place** | 2026 Tenable x WiCyS CTF
- **1st Place** | 2026 WiCyS Cyber Quest Tournament
- **2nd Place** | 2025 WiCyS x Target Cyber Defense Challenge
- **5th Place & Runner-Up Most Creative Report** | 2025 SANS Holiday Hack Challenge

Cybersecurity Projects & Skills

- **Cloud Threat Intelligence** | Deployed T-Pot Community Edition on GCP for 28 days, collecting 96M+ events across a fully exposed attack surface. Queried raw Elasticsearch data daily to track CVE exploitation trends, active campaigns, credential attack patterns, geographic attribution, and cloud infrastructure abuse. Published 11 CTI reports at aerobytes.io documenting findings and methodology.
- **Security Operations Homelab** | Self-designed Proxmox infrastructure with Wazuh SIEM, Active Directory, vulnerable systems (Metasploitable, DVWA), and MITRE Caldera for purple team operations. Automated adversary emulation attacks using Caldera's ATT&CK framework, then refined Wazuh detection rules based on missed indicators.
- **Network Security Lab** | Configured network segmentation with VLANs and Suricata IDS/IPS for defensive monitoring. Built isolated network segments for vulnerable systems to execute controlled attack scenarios and validate IDS rule effectiveness.

Education

SANS Cyber Academy | SANS Technology Institute | 2026

Undergraduate Certificate, Computers and Networking | American Military University | 2022

Associate of Applied Science, Intelligence Operations | Cochise College | 2019

Master of Music Education and Bachelor of Music Performance | Lamar University

Professional Affiliations

VetSec | WiCyS Representative | 2025 - Present

Women in CyberSecurity (WiCyS) | 2025 - Present

Military Cyber Professionals Association | 2025 - Present

Military Intelligence Corps Association | 2018 - Present

Other Work Experience

OSINT Researcher (Volunteer) | National Geospatial-Intelligence Agency | GEMINI Program | 2020 to Present

- Utilized Overpass API and OpenStreetMap to query and validate geospatial datasets, contributing 5,000+ map edits supporting critical infrastructure mapping and intelligence community requirements
- Designed and administered 15 critical infrastructure mapping campaigns to sustain team readiness and support operational intelligence
- Identified and validated critical infrastructure data gaps to improve geospatial accuracy and support intelligence community requirements

Music Educator and Professional Musician | Various Organizations | 2004 to 2015

- Led highly successful band program of approximately 500 students, earning multiple regional and state recognitions for performance excellence
- Developed curriculum, managed student performances, and coordinated community outreach programs
- Applied strong leadership, organizational skills, and cross-functional collaboration with administrators, parents, and community stakeholders
- Performed as Assistant Principal Clarinet in three professional symphony orchestras and as multi-woodwind specialist in musical theater pit orchestras
